

ClassParticipation

A smarter way to structure class participation and student engagement

ClassParticipation is a web-based instructional tool that helps instructors schedule, manage, and evaluate student presentations while giving students clear, structured opportunities to participate. Powered by built-in AI features, it helps students refine their presentation topics, check alignment with the course syllabus, and receive meaningful automated feedback. Instructors benefit from streamlined presentation management, a 0–10 grading rubric, and one-click CSV export for seamless integration with Brightspace.

How It Works (3-Step Process)

1. **Set Up Your Course:** Instructors create a course, define presentation dates, and share Course ID.
2. **Students Register and Submit Topics:** Students join individually or in groups, enter a title and description, and select a date.
3. **Present, Rate, and Review:** Students rate their peers, instructors grade out of 10, and AI provides feedback and topic support.

Key Features for Students

- Simple registration for individuals or groups
- Clear presentation submission workflow
- **AI Topic Check** for syllabus alignment
- **AI-Generated Feedback** after presentations
- Peer rating to build evaluative thinking skills

Brightspace-Friendly Workflow

Instructors can export presentation grades in CSV format that uploads directly into Brightspace, reducing manual transfer and improving accuracy.

Instructor Tools

- 0–10 grading scale with clear descriptors
- Central dashboard of courses and presentations
- AI summaries of peer feedback
- Complete transparency of participation activity
- CSV grade export compatible with Brightspace

Why It Matters

Research consistently shows that structured participation, timely feedback, and reflection significantly improve learning. ClassParticipation enables this by helping instructors:

- Engage every student
- Deliver consistent, meaningful feedback
- Make participation assessment fair and clear
- Build an active learning classroom culture

“ClassParticipation turns presentations into a structured, fair, and feedback-rich part of the course rather than a one-time performance.”

Try ClassParticipation in Your Course

Easy to adopt at the start or middle of a term. Supports participation marks, communication skills assignments, and presentation-based evaluation.
